# ENHANCING ANNOTATIONS

Getting more details for  
extracted data

Julia Giora  
Jonas Castro  
Donat Agosti

<https://plazi.org/>

# > Edit Annotations Attributes

- Click on “Edit Annotation Attributes” and select the annotation you want to edit
- You can choose any attribute and edit it manually. Just remember to click on “Add / Set Attribute to save the changes, and then click on “OK”

The screenshot shows a software interface for managing annotation attributes. At the top, there is a URL: <https://tb.plazi.org/GgServer/summary/D51BB22BFF9BFF9CF12F8517FE69AE2F>. Below the URL, the main content area displays a list of annotations:

- Type: —VIETNAM Vinh Phuc Province Phuc Yen Town, Ngoc Thanh com
- October 2016. Do Van Hai, Trinh Xuan Thanh, DVH 149 (holotype HN)

Below the annotations, there is a context menu with the following options:

- Edit Annotation Attributes ...
- Remove Annotation ...
- Split treatment Before
- Split subSubSection Before

To the right of the annotations, a modal dialog box titled "Edit Attributes" is open. The dialog shows the following attribute list:

- collectingDate: 2016-10-21
- collectionCode: HN
- country: Vietnam
- latitude: 21.397583
- longitude: 105.715775
- stateProvince: Vinh Phuc Province
- typeStatus: Type

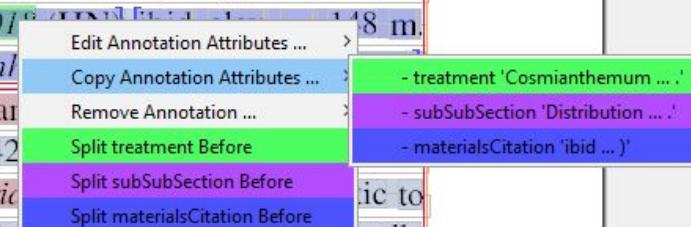

At the bottom of the dialog, there are buttons for "OK", "Cancel", and "Next".

# > Copy Annotation Attributes

- Click on “Copy Annotation Attributes” and select the annotation you want to copy
- Then, just click on the annotation you want to receive the attributes

**Additional Specimens Examined (Paratypes):**—VIETNAM. Vinh Phuc: Phuc Yen Town, Ngoc Thanh commune, elev. ca. 57 m, 21°22'40.7"N, 105°42'41.3"E, 27 January 2013, Do Van Hai et al., ML281 (HN) [ibid]; elev. ca. 155 m, 21°23'51.7"N, 105°43'41.2"E, 25 January 2015, Do Van Hai et al., MLS 135 (HN) [ibid], elev. ca. 160 m, 21°23'52.3"N, 105°42'56.3"E, 15 January 2018, Do Van Hai, DVH 15012018 (HN); ibid, elev. ca. 118 m, 21°23'48.9"N, 105°42'56.9"E, 24 March 2021, Do Van Hai, Nguyen The Cuong, Trinh.

**Notes:**—*Cosmianthemum melinhense* is allied to *C. guangxiense* H.S.Lo & D.Farmer and *C. viriduliflorum* (C.Y.Wu & H.S.Lo) H.S.Lo in Fang et al. (1997: 42) of the inflorescence, stamens, staminodes, and fruits. However, it differs from *C. viriduliflorum* in its lanceolate leaf blade with more pairs of secondary veins, longer bracts and only

# > Parsing Materials Citations

- “Parse materials citations (subSubSection)” will parse the materials from that section individually

Check Materials Citation Details - (1 of 2)

**What to do in this dialog?** (click to collapse)  
Please make sure that all the details of this materials citation are marked.  
If the materials citation refers to the data from the previous one, please do the following:  
- mark the details given here, eg the type status  
- mark the remainder of the materials citation as **backReference**  
This will import all detail data from the previous materials citation.

OK Cancel Customize

The screenshot shows an XML viewer window with a toolbar at the top and a main content area below. The content area displays an XML document with several nodes highlighted in blue. A sidebar on the right lists various XML elements with corresponding colored checkboxes. Some checkboxes are checked, such as 'materialsCitation' and 'paragraph'. The bottom of the window has buttons for 'OK', 'Cancel', and 'Customize'.

Element	Color	Status
collectingCountry	Blue	unchecked
collectingDate	Blue	unchecked
collectingMunicipality	Green	unchecked
collectingRegion	Cyan	unchecked
collectionCode	Cyan	unchecked

typeStatus	Cyan	unchecked

- **Checkboxes:**
  - On the right: boundaries are delimited
  - On the left: all text is highlighted

# > Parse reference

- Click on a reference and select “Parse Reference”. It will parse that bibliographic reference individually

The screenshot shows a software interface for managing bibliographic references. At the top, there is a list of references with context menus:

- Lien, T.K. (2005) Acanthaceae. In: Ban, N.T. (Ed) *Checklist of plant species of Vietnam* 3. Agricultural Publishing House, Hanoi pp. 251-281.
- Lin, Y.F. (2020) *Rhinacanthus spiciformis*, a new species of Acanthaceae from northern Vietnam. *Bulletin de l'Herbier Boissier* 5: 643-681.

The context menu for the first reference includes options: Edit Annotation Attributes ..., Copy Annotation Attributes ..., Remove Annotation ..., Split subSection Before, and Parse Reference. The "Parse Reference" option is highlighted with a green background.

A modal dialog titled "Check Bibliographic Reference Details - (1 of 1)" is open. It contains instructions for marking details correctly and handling multiple references. It also includes a "Not a Bibliographic Reference" checkbox.

The "Book Chapter" tab is selected in the dialog. Below it is a grid of color-coded fields:

author	editor	title	journalOrPublisher
year	part	pagination	DOI
publicationUrl	accessDate	nextRef	volumeTitle
bookContentInfo			

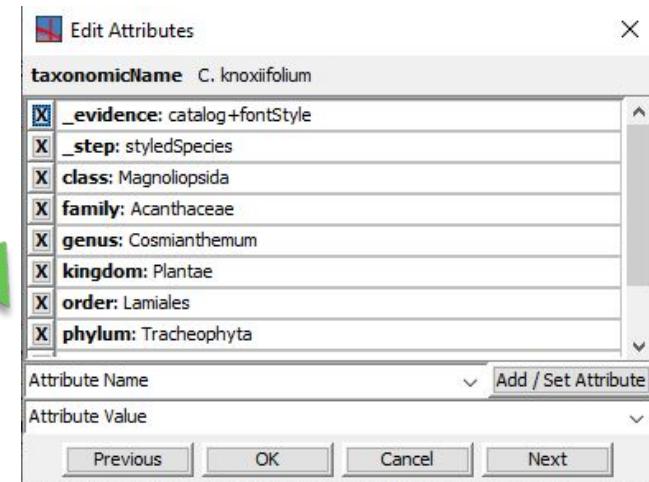

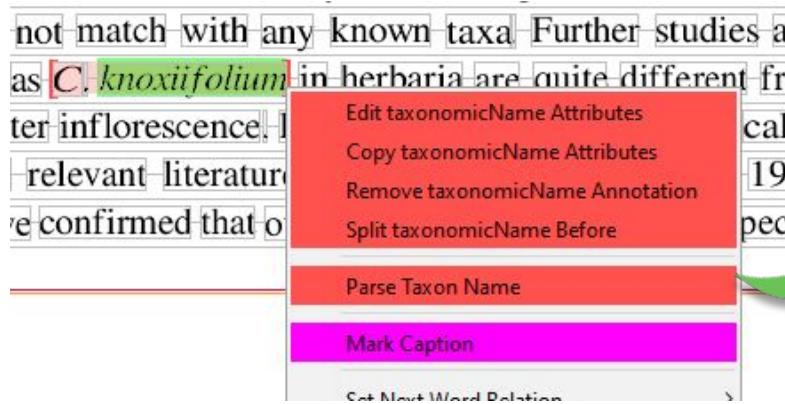

The "author" field contains "Lien, T.K." and the "title" field contains "Acanthaceae. In: Ban, N.T. (Ed) Checklist of plant species of Vietnam".

At the bottom of the dialog are buttons for Cancel, OK, and Reset, along with a "Zoom Control" section.

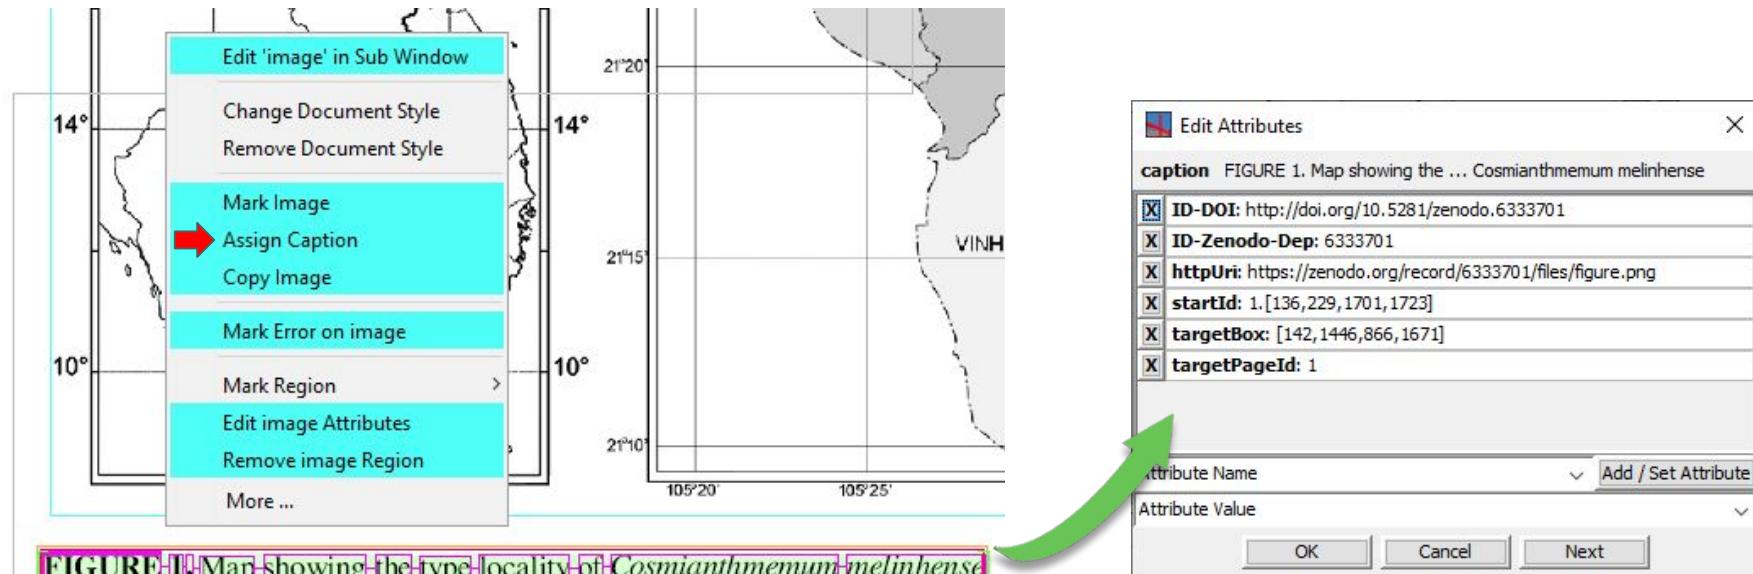

# > Parse taxon name

- Click on a taxonomicName and select “Parse Taxon Name”. The attributes will be imported from GBIF backbone

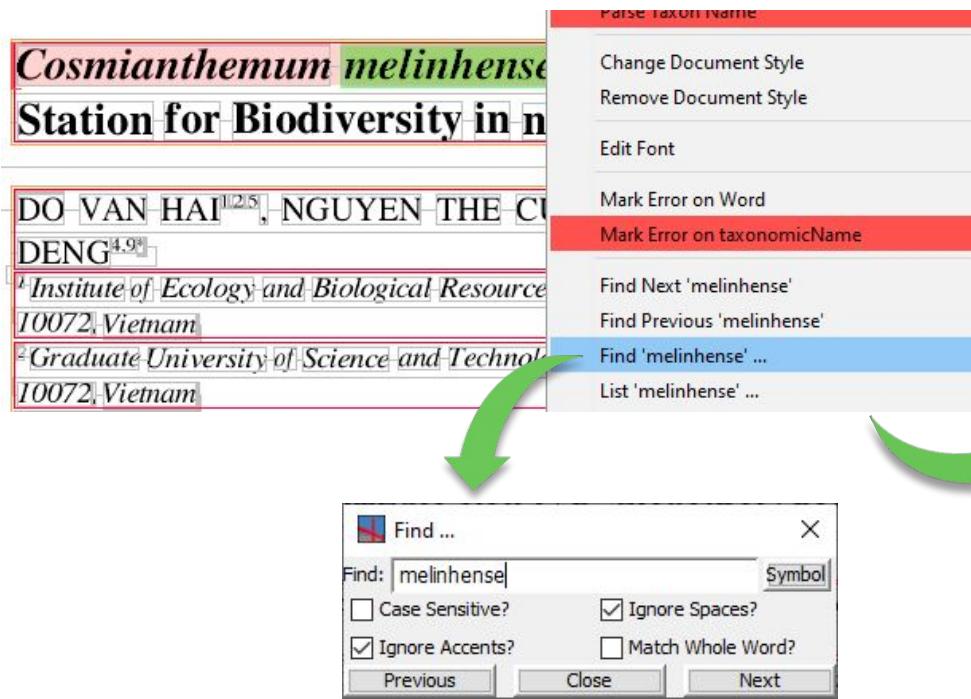

# > Assign captions for figures and tables

- Click on the image/table and choose “Assign Caption”

# > Find or List Words

- Search for a specific word

P.S: Useful for finding all misassigned annotations

## Material and methods

Extensive field works were undertaken in Vinh Phuc province, northeastern Vietnam from 2013 to 2021 by the first author. The morphological description of the new species is based on the examination of fresh plant and dried specimens. Vouchers were prepared following the standard protocol (Jain & Rao 1977). The voucher specimens are deposited in the herbaria of Institute of Ecology and Biological Resources, Vietnam Academy of Science and Technology (HN), and herbarium of South China Botanical Garden, Chinese Academy of Sciences (IBSC). Materials in several herbaria (AAU, BM, E, GXIB, HNU, IBSC, K, KUN, L, P, and SING acronym follows Thiers 2021) were also examined in order to compare with other Asian taxa to determine the new taxon.
